

PRIME CENTRE FOR TRAINING

HIGHER SECONDARY SCHOOL & ENTRANCE COACHING CENTRE

BRIDGE COURSE

From basics to specialization, Xth Students are taking a big leap to XIth Standard. With the kind of attitude and preparation they had in Xth they may not be able to excel in XIth and beyond. This is why even full A+ students find it difficult to understand the concepts of science. Majority struggle to put the preparation of the entrance and board exam together even though they are complimentary.

PRIME—The pioneers in hatching tomorrow’s professionals proudly extends yet another olive branch for empowering the mindset of those entering to Plus One Science Stream. To cater their needs, PRIME designed 45 days BRIDGE COURSE which will give them a strong foundation in the plus one topics and clear edge over the others before the commencement of regular classes.

Indeed it is a springboard for the children aspiring to reach the pinnacle of success. This course is absolutely free for those students who continue their study in Prime and only the early birds can catch the worms.
